

Physics & Space Sciences Department Presents:

“Reaching Interstellar Space: Are We There Yet?”

Dr. Ming Zhang

Department of Physics and Space Science
Florida Institute of Technology

Voyager 1 is now at 122 AU distance from the sun. Very recent signals from the spacecraft seem to indicate it has got into a new territory. NASA does not want to confirm that it has entered into the interstellar space. In the talk, you will hear what a local scientist working on Voyager say about the final frontier of our solar system.

Friday, September 21, 2012

4:00-5:00PM

OPS Room 140
